

# Anti-DDoS Solution Pricing

## Internal Billing Scheme

The Anti-DDoS Solution is charged on a “per-customer” billing scheme. This means that you only need to activate it once, at the customer account level and all your services will become protected by our Anti-DDoS without having to pay extra amounts for each service you need to protect.

This billing scheme is only available for customers hosted in our datacenter (e.g. Dedicated Servers customers, Colocation Customers, Housing Customers ... etc.).

Protected Account	Setup Fee	Monthly Fee
Main account	0€	300€

## External Billing Scheme

The Anti-DDoS solution is charged on a “per-bgp session” billing scheme. This means that you’ll have to pay the service fee for every **protected BGP session** you setup with us. We do not charge you extra, regardless of how many Downstreams you have, you’re only charged for BGP sessions with AS3280.

This billing scheme is only available for customers hosted outside of our datacenters (e.g. IP Transit customers, Protected BGP Session customers, GRE Tunnel customers ... etc.).

Protected BGP Session	Setup Fee	Monthly Fee
1x BGP Session	0€	370€
